

## Why Music?

Music is a Science... It is exact, specific, and it demands exact acoustics. A conductor's full score is a chart, a graph that indicates frequencies, intensities, volume changes, melody, and harmony all at once and with the most exact control of time.

Music is Mathematical... It is rhythmically based on the subdivisions of time into fractions that must be done instantaneously, not worked out on paper.

Music is a Foreign Language... Most of the terms are in Italian, German, or French; and the notation is certainly not English - but a highly developed kind of shorthand that uses symbols to represent ideas. The semantics of music is the most complete and universal language.

Music is History... Music usually reflects the environment and times of its creation, often even the country and or cultural feeling.

Music is Physical Education... It requires fantastic coordination of fingers, hands, arms, lip, cheek, and facial muscles in addition to extraordinary control of the diaphragmatic, back, stomach, and chest muscles, which respond instantly to the sound the ear hears and the mind interprets.

Music Develops Insight and Demands Research...

Music is all these things, but most of all, Music is Art... It allows a human being to take all these, dry, technically boring, (but difficult) techniques and use them to create emotion. That is one thing science cannot duplicate; humanism, feeling, emotion, call it what you will.

This is why we teach music:

Not because we expect you to major in music

Not because we expect you to play or sing all your life

But...

So you will be human

So you will recognize beauty

So you will be closer to an infinite beyond this world

So you will have something to cling to

So you will have more love, more compassion, more gentleness, and more good

In short, so you will have more LIFE.

*Thank you for a wonderful year of music!*
